HIGH-CURRENT CONNECTORS - POWER DISTRIBUTION SYSTEMS
TOURING & INDUSTRIAL APPLICATIONS

The Quality Marks

Safety You Can **PLUG**

Since 1979, KUPO has powered productions around the world, earning the trust of touring crews, theatres, broadcasters, studios, and exhibition venues. Our portfolio spans power and signal connectors, power distribution, and cabling that stand up to the pace of modern shows while meeting international safety approvals. Building on this heritage, we now apply the same reliability to industrial power-connection needs, from data center UPS infrastructure and shore power at ports and marinas to wind energy equipment, water-cooled machinery, heavy construction machinery, welding systems, pneumatic tools, and generator fleets.

Quality and sustainability guide everything we do. KUPO is certified to ISO 9001:2015 for quality management and ISO 14001:2015 for environmental management. For our customers, that means consistent product performance, dependable lead times, clear documentation, and flexible customization backed by controlled, repeatable processes. It also means a supply choice that respects resources, reduces waste and energy use, and supports long service life in the field. The result is dependable power and signal solutions that are straightforward to specify, simple to deploy, and economical to operate over time. This catalog gathers a focused selection of our power products and pairs them with practical reference information so that engineers, specifiers, and technicians can choose with confidence and keep projects moving.

Contents & Index

High Current Single Pole (150A & 400A) 04 – 17

PowerFit and K-LOK (150A/400A) single-pole connectors, Two-Fer/Tri-Fer splitters, and single-pole power boxes, color-keyed, quick-lock hardware for rugged, and safe high-current distribution.

CEE Industrial Plugs & Sockets (16A–125A) 18 – 22

Straight/angled plugs, inline couplers, panel inlets/outlets, and accessories to IEC 60309.

Industrial & Home Appliance (16A–30A) 23 – 28

Turn-Lok, Schuko, and multi-pin mains connectors for tools and appliances.

Professional Entertainment 29 – 45

Socapex (19P/7P), Stage Pin, power leads, XLR (connectors/rings/boxes/adaptors to RJ45), E-Armor, DATAPLEX cable, Versatile Sockets, and lighting bars, tour-grade, numbered, and rigging-friendly for fast show builds.

Power Distribution Box 46 – 53

Linear, metal, rubber, and PA power boxes, multi-outlet distros with optional protection and metering, optimized for truss, rack, or floor deployment.

Cable & Assembly 54 – 59

19-core trunks, 3-core power leads, Y-splitters, and cable rollers, custom lengths and gauges with rugged jackets, strain relief, clear circuit ID, and reels for tidy transport.

Multi-Cable Tester 60 – 62

Dr. SOCA, Dr. Harting, 19P testers, and Digi-Check, portable instruments for continuity, pin-mapping, and wiring diagnostics with quick pass/fail indication.

Cable Management Accessories 63 – 73

KU-HAND carriers, cable crossover ramps, ties, and tapes, practical tools to bundle, protect, and route cables safely with ergonomic handling and residue-controlled adhesives.

Safety & Responsibility Statement Foreword

- Connector selection must account for ambient temperature, installation method/routing, heat dissipation, conductor material, and other relevant factors; the tables are for preliminary evaluation only.
- Always comply with local regulations and follow the guidance of licensed electricians or qualified engineers.

Electrical Wiring Color Code

Three-phase electrical systems use standardized wiring color codes to clearly identify each conductor. These codes, covering both AC and DC distribution, vary by region and have been revised over time. In a typical five-wire three-phase supply, the conductors are: protective earth (PE/earth/ground), neutral (N), and three-phase conductors (L1, L2, L3, also called line / live).

Region	Line 1 (L1)	Line 2 (L2)	Line 3 (L3)	Neutral (N)	Earth (E)
Europe & UK	 Brown	 Black	 Grey	 Blue	 Green
UK (Old)	 Red	 Yellow	 Blue	 Black	 Green
Australia	 Red	 White	 Blue	 Black	 Green
USA	 Black	 Red	 Blue	 White	 Green

Amperage Conversion Chart

This is a quick-reference chart showing the current (amps) drawn at various wattage levels for standard single and three-phase voltages.

Power (W)	Single-Phase			Three-Phase Balanced Load	
	120V (A)	240V (A)	480V (A)	240V (A)	TP 480V (A)
100	0.83	0.42	0.21	0.24	0.12

3P+N+E (5p)

Clock Face Position

POWERFIT Connectors

PowerFit connectors are well fabricated and compatible with major brands of single-pole power connector. The innovative and patent key releasing pin, particularly embedded on each line source and panel source, delivers great safety and convenience without additional tool while uncoupling.

PowerFit is made in high standards. Full series employ high impact and temperature resistance thermoplastic, with flame retardant compound. Ergonomic rubber hand grip on each line connector provides the great comfort to the utility. The M40 cable gland comes standard and while connectors mated, it becomes IP67 rated. Unsurpassed pushing button design makes the handling of coupling and uncoupling easier. Respective phase and line information is clearly marked on the connectors for easy identification. The contact is made of brass with silver-plated, providing excellent conductivity. Cotter pin is made of POM featuring great insulation, high stiffness, low friction and absorbent.

Technical Information

- Current Rating: 400A continuous with 120mmsq 660A continuous with 240mmsq cable.
- Withstanding Voltage: 1000Vac.
- Test Voltage: 4500Vac.
- Short Circuit Rating: Up to 35.5kA.
- Insulation Resistance: >5000 M Ohms at 500Vac.
- Working Temperature: 45 to 85 Degree C
- Contact Type: Set Screw.
- Set Screw Torque on Brass Contact: 10.5 N/meter (minimum required).
- Mating Cycle: 500
- Flammability: UL94-V0.
- CE and RoHS compliant.
- Contact Resistance: 0.1m Ohms.
- IP rating while mated: IP67.
- Contact Material: Brass with silver-plated.
- Housing Material: High Impact Resistant Thermoplastic.
- Cotter Pin Material: POM.

YOUTUBE
POWERFIT 400A SINGLE POLE
POWER CONNECTOR

Innovative push-to-release design makes the uncoupling handy without additional tool. This can be dismantled through small slotted screwdriver if needed.

M40 cable gland comes with two rubber sleeves (I.D. 23mm and 33mm) for the greatest flexibility with fitting the cable.

R120 reduction sleeve made of brass with silver-plated for accommodating up to dia. 16.50mm wire.

Comfort handling with superior & ergonomic rubber grip.

Shorter cotter pin for line source; longer one for line drain. For safety, never reuse cotter pin.

1R **2W** **3BL** **NBK**

PowerFit 400A In-line Source Connector

Remove the cable gland and take out the contact.

Put the contact into the insulator and adjust to align the cotter pin hole

Strip back the cable jacket by around 33mm, then slide on the reduction sleeve over the exposed conductor strand.

When inserting the cotter pin into the insulator, it is easier to hammer it in from the chamfered side of the cotter pin.

Slide the cable with reduction sleeve into the contact, then use a 5mm a/f allen key to tighten both set screws. 10.5N/meter (min. required)

Screw the cable gland, and have a overall check.

Panel Source

- With a male contact, mating with Line Drain.
- Secondary spring pin engages with a slot of source connector to prevent the connector from being uncoupled.

Features

- With a male contact, mates with Line Drain.
- Supplied with M12 threaded post with brass nut and spring washer for cable attachment.
- Color coded and mechanically keyed to prevent mating errors.
- Contacts fitted with a plastic end cap to prevent accidental touching of live parts.
- IP 2X finger protection against electric shock.
- 4 x dia. 5.5mm fixing holes on the flange.

POWERFIT Weatherproof Protective Cover

Protects exposed metal, keeps weather out when connectors are not mated.

The PowerFit weatherproof protective coverIt is made of transparent polycarbonate, which is known for its toughness and durability. Allow for see-through visual identification, and designed to fit all compatible brands of connectors, regardless of the phase. This universal key design eliminates the need for multiple cap versions for different connectors, resulting in easier management and reduced investment in maintaining a diverse stock assortment. All covers have a metal cord lanyard for securing to their parent connector.

K-LOK 400A Single Pole Connector

Kupo manufactures the highest quality single pole connectors available. Kupo cam-type connector has a superior non-conductive retaining screw that passed through the entire contact for superior durability. These single pole connectors have been designed with ease of assembly and disassembly in mind, no special tools are required. K-LOK series connectors mate with compatible CAM products.

K-LOK 150A Single Pole Connector (Mini-Cam)

Mini-Cam is a series of 150 Amp light duty single pole connector in addition to heavy duty 400 Amp ones. Like its heavy duty family members, Mini-Cam is also constructed of Santoprene, possessing a superior performance in insulation. With enhanced features on safety designs and wider range of cable accommodation, Mini-Cam is the ideal and reliable connector for your own job.

Technical Information

Voltage Rating	600V Maximum	Contact Material	Brass
Amperage Rating	150A Maximum	Terminal Accommodation	#8, #6, #4, #2
Base Compound	Santoprene 105 °C rated	Retaining Pin Material	POM

Features

- Cable accommodation from #8 AWG to #2 AWG (for cable outside diameter up to 13.60 mm).
- POM (Polyformaldehyde) ring is two times longer than others for fully encompassing the brass contact for excellent insulation.
- Housing with large ribs for comfort gripping; prolonged body helps user to hold it firmly.
- Two additional longer set screws are supplied for maximum flexibility when smaller cable is used.
- Compatible with other brands of 150A cam-type connector.
- UL/CUL Certified

Double set screws ensure the cable sits firmly in position; longer set screws are supplied for securing smaller cables.

Boot made of UV-resistant Santoprene, providing excellent protection. Safer and more durable.

Cable size or cut-length identification clearly engraved on the boot.

The tension hole at rear side of split contact retains the contact from over pressed, so as to prevent the loose mating after several time of uses.

KUPO CEE form Connector

CEE form (IEC 60309) industrial plugs and sockets, formerly known as “CEE 17”, are standardized, heavy-duty connectors engineered for reliable power distribution across harsh and varied environments. KUPO’s range covers 16–125 A and 110–400 V with keyed clock positions for correct mating, and is offered in IP44 splash-proof and IP67 watertight versions with CE marking for regulatory compliance.

Optimized for mainstream industrial use, these connectors serve manufacturing lines, construction sites and temporary power, generator and rental fleets, shipyards/shore power, utilities and water treatment, HVAC and pump systems, logistics hubs, and agricultural equipment. The B&B variant (blue lid /black body) provides clear 230–250 V visual identification while the low-glare black housing hides dirt and wear, ideal for heavy-duty installations.

Technical Information

Amperage Rating	16-125 A	Contact Material	Nickel-Coated Brass (RoHS Certified)
Voltage Rating	110-400 V	No. of Pole	2P+E(3P), 3P+E(4P), 3P+N+E(5P)
IP Rating	IP44 / IP67	Base Compound	PA6(RoHS Certified)
Standard	IEC60309-1, IEC-60309-2 Compliance		

IP67 - Watertight

Reliable Watertight Performance

A molded-in-place cover gasket preserves a long-lasting seal in demanding conditions.

Enhanced Safety with Earth Contact Design

Protective earth engages first and releases last to safeguard every mating cycle.

Secure Cable Retention

A heavy-duty cable grip delivers strong strain relief and resists accidental pull-out.

High-Strength, Non-Conductive Housing

Impact-resistant nylon construction boosts durability while enhancing electrical safety.

Sealed Grip with IP67 Protection

A turreted grip with an integral neoprene gasket provides dust-tight, watertight IP67 sealing.

Rugged Screw-Type Fitting

Screw coupling maximizes mechanical strength for stable performance in harsh use.

IP44 - Splashproof

Enhanced Safety with Earth Contact Design

Protective earth engages first and releases last to safeguard every mating cycle.

Anti-Loosening Fin Structure

Fin-shaped housing resists loosening during mating, improving connection reliability.

Secure Cable Retention

Heavy-duty grip provides strong strain relief and prevents cable pull-out.

Quick-Lock Housing with Tool-Free Operation

Bayonet twist-lock enables tool-free open/close for faster installation.

High-Strength, Non-Conductive Housing

Impact-resistant nylon construction boosts durability while enhancing electrical safety.

IP44 Watertight

- A practical and reliable solution for indoor and light-duty environments, the IP44 series provides splash-proof protection and versatile performance.
- Rated to IP44, offering resistance against splashing water and solid contaminants.
- Ideal for heavy commercial applications and light industrial use, where moderate protection is sufficient.
- Available in 16A and 32A versions, meeting the needs of various equipment and power distribution setups.

Reference Standard

EC 60309-1

Plugs, fixed or portable socket-outlets and appliance inlets for industrial purposes - Part 1: General requirements

IEC 60309-2

Plugs, fixed or portable socket-outlets and appliance inlets for industrial purposes - Part 2: Dimensional compatibility requirements for pin and contact-tube accessories

Tool-Free & Quick-Lock Housing

Use a tool such as a screwdriver to press the latch inward, then twist the front housing to open.

Easy Wiring and Secure Connections

All terminal screws face the same direction for faster installation. Using wire ferrules on bare copper ensures maximum contact, stronger pull resistance, and safer connections.

Anti-Loosening Fin Structure

The fin-shaped housing design keeps the connector cover securely locked after mating, preventing loosening and ensuring a stable connection.

IP44 Plug (Male)

IP67 Watertight Series

- Engineered for maximum reliability in harsh environments, the IP67 series combines watertight construction with rugged durability.
- Certified to IP67 protection standards, ensuring complete resistance against dust and temporary immersion in water.
- High-strength thermoplastic housings withstand impact, mechanical stress, and corrosion, making them suitable for demanding applications.
- Advanced strain relief and sealing system guarantees superior cable retention and watertight conductor termination.
- Designed for outdoor, marine, and wash-down environments, where moisture and contaminants are a constant challenge.

Rugged Screw-Fastened Housing

Screw-secured housing and coupling for 63A/125A CEE form connectors, ensuring maximum strength and reliable performance in harsh conditions.

Easy Wiring and Secure Connections

All terminal screws face the same direction for faster installation. Using wire ferrules on bare copper ensures maximum contact, stronger pull resistance, and safer connections.

Sealed Grip with IP67 Protection

Rotate the plug's turreted grip after mating to lock, ensuring dust-tight and watertight IP67 protection.

Rugged Screw-Type Fitting

Tighten the screw coupling to achieve maximum mechanical strength and stability, ensuring reliable performance in demanding conditions. (For 125A Version Only)

Turn-Lok, Nema Locking Connector

TURN-LOK connectors are the choice for quality electrical demand. UL and cUL listed, and also made to comply with NEMA 20A and 30A configuration. It is constructed of sturdy Nylon, PBT (thermoplastic) and premium grade of copper alloy, ensuring the durability and reliability for power connection. Turn-Lok is available in both receptacles and plugs for voltage AC125/250V, and covering up the needs for single and three phase applications.

Specification

- Material: Nylon and PBT (thermoplastic) for line male and female; PBT only for socket receptacle.
- Terminals: 1.8mm Copper alloy for 30A line male/female, 1.6mm copper alloy for 20A line male / female, 1.2mm copper alloy for receptacle.
- Terminal screw: #10 screws bronze.
- Wire accommodation: AWG #12 wire (for 20A connectors) / AWG #10 wire (for 30A connectors).

Features

- Ribbed main body for firm and secure gripping.
- Constructed of PBT (thermoplastic) and Nylon for greater impact-resistance and insulation.
- Screw-type cord grip for maximum tightening force.

KUPO Multi-Pin Connectors

A reliable and versatile solution for various industrial applications, offer a rated voltage range of 400-600 V, meeting UL and CSA safety standards (UL 498 / CSA C22.2). The advantages of industrial connectors, such as their rugged construction, ability to withstand frequent setup and teardown, and capacity to handle high voltage, make them ideal for the demanding conditions of touring and entertainment environments.

In the entertainment sector, the 10-pin and 16-pin options are widely utilized, while additional contact configurations can be accommodated upon request.

SCHUKO Connector

SCHUKO is a protective-contact plug system widely used across Germany and much of Europe. Its defining feature is a grounding design that engages the earth connection before the live contacts, providing enhanced protection against electric shock and a stable, reliable connection. KUPO offers a complete 16 A SCHUKO range, including plugs, inline connectors, inlets, and panel-mount receptacles, available as assembly-type versions with either rigid housings or rubber encapsulated bodies for added grip and durability.

Specifications

- 16A / 220-250 V, single phase rated
- Contact pins: Copper-plated nickel / 2P+E
- IP44 protection, splash-proof when mated
- Flame retardant PA66 housing (rubber)
- International safety certification: CE

PLS 19-Pin Connector Series

Features

Kupo 19-Pin Connector Series is engineered for professional-grade power distribution in demanding environments. Featuring rugged die-cast aluminum alloy shells with a black non-conductive finish, the connector is built for durability and safety. Its two-shell design makes cable assembly fast and efficient, while hard gold-plated copper alloy solder type contacts to ensure superior conductivity. The non-conductive Bakelite insulation provides maximum dielectric protection. An integral strain relief system accommodates a wide range of cable sizes, and the extended female ground contact ensures a "mate first, break last" connection for added operational safety. Fully compatible with Socapex "419" and Veam "VSC" connectors, this series is also UL / cUL listed and supports PG29 cable glands for enhanced versatility.

Technical Information

- Rated Current: AC 20A 250V
- Operating Limit Voltage: AC 400V
- Insulation Resistance: > 2000M Ohms
- Contact Resistance: < 3m Ohms
- Rated Voltage: AC 1500V
- Terminal Wear: 5000+ connection
- Hipot Test: 1800 VAC / Min.
- Operating Temperature: -40°C to 85°C

Kupo cable grip is designed for PG29 thread 19-pin connectors. It is for cable enclosure to prevent pullout from tension, vibration, flexure or motion. Fabricated of stainless steel wire mesh weaves and aluminum alloy fittings provide easy installation bending control plus corrosion resistance. Grips with knurled texture on the fitting for excellent handling, and neoprene bushing offers watertight and dustproof protection. Support grip is weaved of dia. 1.2 mm stainless steel wire for load capacity 60 kgs.

**PLS-CG18 Cable Grip**

**PLS-SG21 Support Grip**

Support Grip, feasible for O.D. 18-21 mm cable.

WPC 19-Pin Connector Series

The Kupo WPC 19-Pin Connector is expertly crafted from machined aluminum alloy and features a robust, ribbed locking ring for smooth, manual operation. Designed as a mono-piece body, it achieves IP67 watertight protection when assembled with the provided cable gland. The hard-anodized back shell enhances durability by resisting surface scratches.

This connector is fully compatible with Kupo PLS series, as well as Socapex 419 and Veam VSC connectors. It includes hard gold-plated contacts in solder types, and features an extended female ground contact to ensure a "mate first, break last" safety mechanism. The FPG-42 sealing system, consisting of a CG-35 cable gland and interchangeable rubber sleeves, ensures a waterproof cable entry, accommodating a range of cable diameters. UL / cUL listed for dependable performance in professional environments.

Technical Information

- Rated Voltage: AC 1500V
- Terminal Wear: 5000+ connection
- Hipot Test: 1800 VAC / Min.
- Operating Temperature: -40°C to 85°C
- Rated Current: AC 20A 250V
- Operating Limit Voltage: AC 400V
- Insulation Resistance: > 2000M Ohms
- Contact Resistance: < 3m Ohms

WPS 19-Pin Connector Series

Features

Kupo WPC Watertight Connector offers a rugged and waterproof solution for professional lighting setups. Constructed from precision-machined aluminum alloy, its mono-piece body and ribbed locking ring allow for easy manual operation and achieve an IP67-rated seal when used with the FPG-42 cable gland. The connector's Teflon-coated threads ensure smooth coupling/uncoupling, while the hard-anodized back shell resists surface scratches for long-lasting durability. Compatible with industry-standard systems like Kupo PLS/WPC, Socapex 419, and Veam VSC, it features hard gold-plated contacts for both solder and crimp use. An extended female ground pin ensures "mate first, break last" safety connection. UL / cUL certified for reliable performance in demanding environments.

Tool for 19-Pin Connector

WPC-5219ST and WPC-5219SY 19-PIN TOOL

Two practical tools designed for saving the pain of unscrewed-backshell while mating or unmating mono-piece connectors.

WPC-5219ST

- A) Fit to major brand 19 pin mono-piece connector.
B) Avoid accidental unscrew of the backshell while coupling or uncoupling.

Coupling with female inline connector.

Infixed rubber ring protects inline female connector.

Coupling with male inline connector.

WPC-5219SY

Clear indication for operation.

WPC-5219ST and WPC-5219SY spanners helps with tightening the connector.

KC 7-Pin Motor Cable Connector

Kupo PLS-4207 multiple connectors are often applied to combine chain hoist power and control cable as one. It makes a safe, compact and quick setup rigging. Two rugged die cast aluminum alloy half shells in black non-conductive finish for easy cable assembly. Hard gold plated contacts in soldering version and fully compatible with Socapex SL37 family. The extended female ground contacts allow mating first / breaking last.

Electrical Characteristics

- Rated Current/voltage: 6 x 25A + 1 x 50A 250V
- Operation Limit Voltage (AC. V. Rms): 250
- Withstanding Voltage (AC. V. Rms): 2000
- Insulation Resistance (MΩMin) at DC 500V: 2000
- Contact Resistance (MΩMin) at DC 1A: 3
- Number Of Contacts: 7 Contacts: - 6 x 12AWG + 1 x 8AWG
- Operating Temperature: -40 + 85°C
- Hipot Test: 1800 VAC / min
- Terminal Wear: 5000 + Connections

Pin-out for 7pin Motor Connector: (according to ANSI / E1.6-4 2022)

- 1 = L1
- 2 = L2
- 3 = L3
- 4 = MOTOR UP
- 5 = GROUND
- 6 = MOTOR COMMON
- 7 = MOTOR DOWN

Important Note

There is no industry standard wiring for chain hoist using 7pin connector. Since mixing gear from different suppliers is a common practice, you should always double check the equipment and not assume the wiring is correct or has been changed. 7-pin connectors carry power and control together and there is a potential for harming the equipment or the operator if the wiring configuration is not confirmed.

Head-to-ballast Connector

The KUPO HB connectors' range is designed to meet the needs of head to ballast connections. HB series cover the range of power from 575W to 18KW used by Arri.

Features

- Compatible with Veam CIR connectors.
- Machined aluminum bodies with ribbed coupling ring to provide easy manual coupling and uncoupling.
- Back-shell with scratch resistant and black anodized.
- Back-shell and cable clamps to fit different cable O.D.
- Waterproof to IP67.
- The grip rubber on locking ring.

We keep all the models in stock for inline male and female assembly. WPC-2407 series are available in different key position arrangement for various lighting fixtures, WPC-2806 & WPC-2809 series are only for 6K-18K Arri lights.

Stage Pin Connector (20 AMP Inline plugs and connectors)

This 20A connector is engineered for reliability, ease of use, and long-term performance across a variety of demanding applications. Fully compatible with all other standard 20A connectors, it features a high-temperature thermoplastic body rated up to 250°C, ensuring exceptional durability without melting or breakdown.

The ergonomic housing provides a comfortable grip for frequent handling, while the crimpless pressure terminal eliminates the need for ring terminals, paired with a wider wiring chamber, it allows for easier, faster wiring. Inside, the brass pins are fully removable and float within the housing for precise alignment and minimal resistance, and can be replaced if damaged.

The female sleeves are spring-loaded with a split design that maintains constant pressure on the male pin, ensuring consistent contact even with slightly deformed or crushed pins. Terminals are clearly marked according to NEC standards to prevent mis-wiring, and the rear cable entry is designed to accept standard 12/3 hard-service cables.

This connector offers a perfect balance of rugged performance, smart design, and installation efficiency, making it a trusted solution for professionals in the field.

20 AMP Panel Mount Stage Pin Connector

Purpose-built for the demands of live events and touring environments, these panel-mount connectors are ideal for power distribution in stage, lighting, and AV applications. Available in both male and female versions, each connector features a screw-driven mounting clip for fast, tool-friendly installation on panels of varying thickness, perfect for quick setups and breakdowns on the road.

Precision-machined solid brass contacts ensure reliable power delivery under heavy use. Stripped conductors can be inserted through the cross-hole and pressure-terminated using the included wire shoes, while panel-mounted models also support ring terminations for added flexibility in different rigging configurations.

A self-grounding mounting clip streamlines setup by removing the need for a separate ground wire, helping crews work faster and safer. Designed to precisely match industry-standard panel cutouts, these connectors offer a dependable fit for custom panels and touring racks, making them a go-to choice for professionals in the field.

KUPO STAGE PIN
TESTERS FT. VOLTAGE
METER & LAMP TESTER

TSP-20LMTR Stage Pin Power Tester

A simple and compact voltage meter to use with stage pin. No cumbersome setting and switching. Works on 90-240VAC wide range of voltage. Also the LED will light up while the tester detect the wiring of Live and Neutral is switched. Supplied with lanyard and hook for easy belt attachment to carry on.

TSP-20LFTR Kupo Stage Pin Lamp Tester

Kupo Stage Pin lamp tester helps to diagnose the bulb continuity before you rig the fixture. While LED indicator fails to response, please check the lamp (bulb) to make sure it is not burned out. If the bulb is good, then there is something wrong with wiring. It has a built-in battery so external power is not required. Plus, it comes with a buzzer and you will not only see but hear authentically the test result.

Features

- Quickly test for lamp (bulb) continuity or short by plugging into tester.
- Easily to indicate a good lamp while tester is buzzing and green LED lights up.
- Come with a key ring for clipping the tester to tool belt.
- Built-in CR2032 Lithium DC3V battery.

TSP-PS Pin Splitter For Stage Pin

Used for clean, straighten, and spread the stage pins. Made of insulative polycarbonate material, it is strong and durable. A built-in wire brush helps to clean the pins of 20A stage pin connectors, and a recessed blade spreads the compressed pins to make a good electrical contact. Comes with a Nylon belt pouch with hook and loop flap closure.

Powerlead T1 Connector

Powerlead T1 is single phase power connector certified with breaking capacity (CBC) according to IEC 60320-1, featuring the capability to be connected or disconnected under load or live. The twist-and-lock design ensures the mating engagement with the greatest security. It is rated 16A and IP65 waterproof. Reliable and suitable for LED fixture and abundant need of power supply in entertainment.

Technical Information

- Contact resistance: $\leq 3 \text{ m}\Omega$
- Dielectric strength: 4kVdc
- Insulation resistance: $> 0.1 \text{ G}\Omega$
- Rated current per contact: 16A
- Rated voltage: AC250V
- Temperature range: -30°C to $+80^\circ\text{C}$
- Max wire size: 12AWG / 2.5mm²
- 94V-0/HB flame-retarded grade
- IP65 dustproof and waterproof
- Compliance with ENEC / IEC 60320-1

Features

- Connector with breaking capacity (CBC), designed to be engaged or disengaged in normal use when live or under load.
- ENEC 16 certified with IEC 60320-1
- Single phase 16A / 250V
- Screw push-pull copper block stamping piece contact body structure.
- PE pin priority connection structure.
- IP65 dustproof and waterproof when mated.
- With in-line male and female mating directly.

Powerlead Connector

Powerlead is 20A/250Vac rated single phase AC power connector, featuring twist-and-lock engagement with greatest security. It is UL listed and made with high standard to fulfill the rigorous criteria in the entertainment industry. Ideal for LED fixture as power source. POWERLEAD is compatible with major brand of the likes.

Features

- Non-interchangeable and color-coded, ensuring mistake-proof connection system. Blue for power-in, and grey for power-out.
- Contact with one micro silver-plated for excellent electric conductivity.
- Metal flange on the slot fixity to avoid any fray.
- Reinforced thermoplastic forms the housing for the robust and maximum durability, and UL94V-HB flame-retardant meets safety requirements.
- Ergonomic latch for handy use with less effort and ensure the firm lock.
- T-type thread on inner side of rear cap enhance the rotary tightened for slip free.
- Hexagonal-shaped rear cap for operation with bare hand or a wrench, rubber bushing fits wide range of cable and provides outstanding environment protection.

Electrical

Contact resistance: ≤ 3 m Ω / Dielectric strength: 4 kVdc / Insulation resistance: > 0.1 G Ω (after damp heat test IEC 68-2-30) / Rated current per contact: 20 A / Rated voltage: 250 V

Material

Bushing: Polyamide (PA6 15% GF) / Contact plating: 4 μ m Ag / Contacts: Bronze (CuSn6) / Insert: Polyamide (PA6 30% GF) / Locking element: Zinc diecast (ZnAl4Cu1) / Shell: Polyamide (PA6 30% GF) / Strain relief: POM

Environmental

Solderability: Complies with IEC 68-2-20

XLR Connector

This industry-standard XLR connector is designed for professional audio, video, and stage lighting applications. Its compact and robust construction features a die-cast shell, fiberglass-reinforced insert, and a secure chuck-type strain relief. The gold-plated pins ensure excellent conductivity, resistance to corrosion, and long-lasting performance. It is ideal for balanced audio connections as well as lighting control and low-voltage power applications.

Specifications

- Gold-plated pins for superior conductivity and corrosion resistance
- Durable die-cast shell with compact design
- Fiberglass-reinforced insert for high stability
- Secure chuck-type strain relief for reliable cable clamping

XLR-WPC XLR Water Proof Cover

XLR-WPC is designed to protect XLR connector from wet and dust. See-through transparent PVC body helps check up mating status easily. Feasible for O.D. 4-6 mm cable. IP66.

XLR-BJS Black Jelly Sleeve

XLR-BJS is silicon made sleeve for XLR cables with superior protection, especially for those ready-made cables without protection on connector in advance. With this elastic black silicon sleeve, the ordinary cable is prompted with additional shield. IP65 while mated and feasible for 3pin and 5pin XLR.

DMX Data Transmission Cable

The XLR Color-Coded ID Ring is a practical accessory designed for easy cable management and identification. Made of durable PA material, these color-coded rings can be quickly attached to any standard XLR plug without the need for unsoldering the insert. Available in multiple colors, they allow users to distinguish between different cables at a glance, ensuring faster setup and improved workflow efficiency.

ID Ring is designed for identification.

Six standard colors are available.

- ID RING-W White Color
- ID RING-B Blue Color
- ID RING-R Red Color
- ID RING-Y Yellow Color
- ID RING-P Purple Color
- ID RING-GN Green Color

KUPO Linear Data Distribution Box

Introducing the RJ45 to XLR Data Distribution Box, the perfect solution for distributing DMX data from your device in between EtherCon (RJ45) and 5Pin XLR connectors. Crafted from high-quality aluminum, this compact and durable box is designed for portable use and built to last. Its sleek and sturdy housing provides reliable protection for your valuable data connections, making it the ideal choice for professionals on the go. With its RJ45 and 4 x XLR connectors, this Data Distribution Box is versatile enough to be used in a wide range of applications, including live events, concerts, theaters, and more. It provides a seamless and reliable connection between your EtherCon (RJ45) device and your XLR equipment, allowing you to focus on your performance without worrying about data loss or interference. Whether you're a DJ, lighting designer, sound engineer, or any other professional in need of a reliable data distribution solution, the Data Distribution Box is the perfect choice.

PDB-E1401M RJ45 to 4 x 5Pin XLR Male

Features

- Designed as EtherCon (RJ45) to XLR adapter for DMX data connection
- Made of sturdy aluminum housing , lightweight and durable
- Surface treatment with black non-conductive hard anodizing
- Equipped with low profile bracket for attaching lighting clamp
- Available with 5Pin male XLR or 5Pin female XLR connectors

Pin and wiring definition of this box refers to the following:

Wiring / Connector	XRL2	XRL3	XRL4
Data Common	Pin 1	Pin 1	Pin 1
White & Orange		Pin 3	
Orange		Pin 2	
White & Green	Pin 3		
Green	Pin 2		

PDB-E1401F RJ45 to 4 x 5Pin XLR Female

Low profile bracket makes the box easy to assemble with a lighting clamp

Wiring / Connector	XRL1	XRL2	XRL3	XRL4
White & Blue				Pin3
Blue				Pin2
White & Brown	Pin 3			
Brown	Pin 2			

Kupo RJ45 to XLR adapter cable

Kupo RJ45 to XLR adapter cable is designed to provide seamless connectivity between devices with different ports. This versatile cable features an RJ45 connector on one end and a 5pin XLR connector on the other, allowing you to connect devices with ease.

Crafted using high-quality CAT6 UTP 24 AWG black cable, this adapter cable delivers reliable performance and durability, ensuring long-lasting use. The cable measures 50cm in length, and longer length is available on request. Available in two versions - the 5pin XLR male and the 5pin XLR female. Choose the version that best suits your needs and enjoy effortless connectivity between devices.

Features of CAT6 UPT 24 AGW cable

- Pure copper wire cores for low impedance and minimal signal loss
- 8-core twisted pair structure minimizes interference for stable signal transmission
- PVC outer coating is durable, tough, and resistant to deformation
- Passed Fluke test for quality and performance assurance
- Available with 5Pin male XLR or 5Pin female XLR connectors

KUPO E-Armor

All-new E-Armor Premium makes DMX signal connecting over Ethernet cable easiest ever. With increasing adoption of Ethernet cable by audio, LED screen and lighting equipments, conventional RJ45 is not enough to fulfill the diverse applications, particularly when DMX signal have to daisy chain over different devices and might encounter compatibility issue. E-Armor Premium comes to eliminate the inconvenience and bring up most comfort while handling such signal cable set.

Standard Package

E-ARMOR-P Ethernet Armor (Premium)

E-Armor Premium features rapid removal of front shell, which turns this Ethercon-compatible to RJ45 immediately. No need to dismantle while using it to attach RJ45 outlet. Front shell is made of die-cast aluminum alloy, rigid and free from deformation over frequent handling. RJ45 latch protector ensures latch won't get broken easily in heavy operation.

Take the front shell.

Align the key to the slot.

Attach, turn, snap!

Voila! From RJ45 to Ethercon-compatible is just that easy!

Portable DMX Data Cables

High-quality, flexible DMX data cables for professional lighting control. Built with tinned-copper conductors, foamed-PE insulation for stable signal geometry, 100% aluminum/mylar foil shielding with a dedicated tinned-copper drain wire, and a matte black, flame-retardant jacket that resists UV- and fungus-resistant. Specifications are ETL-verified for DMX512 performance. Perfect solution for DMX512 control runs, console-to-dimmer links, trunk-line and universe distribution wiring, and portable rigs in rental, touring, theater, architectural, and themed environments.

KCWDP222TBK

KUPO DMX Lighting Bar

The VS Lighting Bar is launched with the high quality that Kupo Par Bar has been known for, featuring new construction of the bar with versatile socket. With the classic 3.25mm(T) x 51mm(dia.) aluminum alloy tube in selective length together with ABS-injected versatile socket for seating the power panel, VS Lighting Bar is going to fulfill both conventional and uprising mainstream LED fixtures in entertainment field. VS Lighting Bar has diverse models. The DMX model is wired with 20A power connector for main input and output, as well as 5-pin XLR for DMX in and thru connection. It is available in 4-outlet and 6-outlet, and each outlet comes one VS socket with Schuko female and DMX female for power and data connection for every single fixture. The DMX model is designed to meet the demand for LED fixtures. The conventional model is wired with 19-pin panel male for dimmer control, and Schuko or CEE is mounted on versatile socket in this range. Special configuration is available upon request.

KUPO Linear Power Distribution Box

Manufactured of extruded aluminum housing, this series of power distribution boxes have slim line profile yet robust and lightweight features. Black hard anodize coating keeps the housing electrical insulated. Equipped with various sockets for diverse need; available with 90-240V voltmeter for easier voltage identification, or DC5V/2.1A USB outlet as smart devices charger

Input: 1 x 20A Neutrik PowerCon

Output: 1 x 20A Neutrik PowerCon

Output: 5 x 20A 250V 2P+E Universal socket

Dimension: 410 (L) x 66 (W) x 42 (H)/mm

stainless steel screws

PDB-L1801

8 Way Linear Distribution Box with Voltmeter

Input: 1 x 20A Neutrik PowerCon

Output: 8 x 20A Neutrik PowerCon

Dimension: 335 (L) x 66 (W) x 42 (H)/mm

Formed of extruded aluminum alloy with hard anodized surface treatment. Robust, lightweight, and excellent electrical insulation.

A built-in voltmeter, taking 90-240VAC and giving clear display of working voltage, helps to reduce the damage from mains misconnection.

19" rack mountable module available. Making build-up or add-on easier for greater power distribution.

Mobile phone friendly! DC5V/2.1V USB charger supports the electric supply for your smart phone and devices.

Compact and rugged finish. This streamliner distribution box is made of aluminum alloy extrusion, making it slim yet great toughness character. Designed for the need with max 20A power consumption. Extremely lightweight and takes much less storage space. Built up with cUL-listed turn-n-lock Powerlead connector and compatible with the other brands. Four outputs per each unit.

Compact & Slim Profile

Compatible with Neutrik PowerCon True1

PDB-L1401

4 Way Linear Distribution Box

Powerlead power distro box, 4 outputs, max. 20A (compatible with Neutrik PowerCon).

Input: 1 x 20A Powerlead (Neutrik PowerCon compatible)

Output: 4 x 20A Powerlead (Neutrik PowerCon compatible)

Dimension: 170(L) x 44(W) x 65(H)/mm

PDB-L1402

4 Way Linear Distribution Box

Powerlead T1 power distro box, 4 outputs, max 16A (compatible with Neutrik PowerCon True1).

Input: 1 x 16A Powerlead T1 (Neutrik PowerCon True1 compactible)

Output: 4 x 16A Powerlead T1 (Neutrik PowerCon True1 compactible)

Dimension: 204(L) x 44(W) x 65(H)/mm

The robust chassis is fabricated with high tensile aluminum extrusion with black anodized finish. Mylar film completely wraps around the inner soldering area for best insulation. Soldered with 2.5mm silicon wire secures higher working current capacity. Assembled with 20A lockable socket, and compatible with original Neutrik Powercon connectors.

PDB-11JB Power Junction Box

KUPO Power Distro Rubber Box

Made of rubber cubic box featuring sturdy and robust housing. This range of distro boxes are fabricated with cUL-listed 20A powerlead receptacles, as well as CE-compliant 16A or 32A CEE form receptacles. The boxes are made with 6 outlets for the greatest electric utility. Outlet panel is equipped with rubber cap rest so that the CEE form connector cover can hook on it without slip. Fully insulated, flame-retarded and UV resistant.

PDB-C1601 Power Distro Box

6 powerlead outputs, max. 16A

PDB-C1601D Power Distro Box

PDB-C1602D Power Distro Box

6 powerlead outputs, max. 32A, with CEE form 32A output.

PDB-C1603 Power Distro Box

6 powerlead outputs, max. 20A

PDB-C1603D Power Distro Box

6 powerlead outputs, max. 20A, with Soca 19pin output.

Rubber cap rest for the lid of connector to hook up while connectors are coupling.

KUPO Power Distro PA Box

Electricity is the fundamental element and source to the lights. Stable and reliable distribution of power plays an important role in a successful lighting performance. Kupo's plastic power distribution is constructed of PA material which offers excellent insulation, impact-resistance and flame-retarded features. With in-house bracket structure, it can be diversely attached to the truss or tube with combination of clamps. Other than rigid PA material, this box is also fabricated with quality connectors, and assembled through experienced craftsmanship, which ensures the durability and reliability.

Features

- Dual handle slots allow flexible movement of couplers.
- Central aperture on handle for single coupler provides attachment to truss easily.
- Rectangle and less bulky shape accesses to truss with no efforts.
- Perforation slots for the convenience of CEE and Schuko positioning.
- Black CEE and Schuko meet the low-key and professional requirement.
- Blue lid of CEE connector gives the clear identification of AC/220Vac 16 Amp.
- Embedded screw nut gives great convenience protection while assembling the box by screws.

KUPO Power Distro Metallic Box

KUPO metal power distribution boxes feature 1.2 mm-thick steel-sheet construction for rugged durability. A recessed front panel protects each connector from impact, while two standard suspension rings simplify truss rigging. Each side also provides an auxiliary clamp hole for mounting in tight or constrained spaces. KUPO offers a broad range of configurations, with further variations available upon request.

Bottom with X support enhances the durability.

Lid rest can be added for resting the lid of female CEE form connector.

Footpad uphold the upright stability.

PDB-RCB Rubber Cubic Box

Molded of hard rubber, this cubic and robust box features fully insulated, impact-proof, water and corrosion resistance. Silicon O ring keeps the lid tightly attached to main housing. Corner is rounded to prevent the damage over sharp bumps. On the bottom are four footpads for upright application. One side of lid is grooved slightly in the central so that it can accommodate the lid rest for resting CEE form connector cover when it is made to be a power distribution box. Flame-retarded and UV resistance.

It is molded of sturdy rubber fully insulated, providing shock, impact, corrosion and weather resistance, and feasible for using with 19-pin, CEE and other connectors. Durable and Portable. Compact size allows truss access and standing foots for floor application. The hooking strut is for firm hook up with CEE protection cap.

KUPO Power Distro PA Box

Y-Cord or Twofer, are cabling device used in theatrical stage lighting. It allows two stage lighting instruments to be connected to one dimming channel. Never having cumbersome for jamming two wires into a single connector. Kupo Y-Splitters are constructed with two layers. The inner core is PVC injection-molding, offering great tensile force while the outer is rubber molding cover with excellent impact-absorbency. The mold-in extension is H07RN-F rubber cables (overall length 1M) with fire retardant and oil resistant specs. It is wired in parallel or series.

YS-4.0

YS-4.0-CEE

Parallel / Series sticker mark with transparent heat-shrink sleeve identify the wirings clearly.

Part Number	Description
YS-2.5	Y Splitter, 3 x 2.5mmsq rubber cable, length 1M, parallel wired
YS-2.5/S	Y Splitter, 3 x 2.5mmsq rubber cable, length 1M, series wired
YS-2.5-CEE	Y Splitter, 3 x 2.5mmsq rubber cable, length 1M, parallel wired with 16A CEE form connectors
YS-2.5/S-CEE	Y Splitter, 3 x 2.5mmsq rubber cable, length 1M, series wired with 16A CEE form connectors
YS-4.0	Y Splitter, 3 x 4.0mmsq rubber cable, length 1M, parallel wired
YS-4.0-CEE	Y Splitter, 3 x 4.0mmsq rubber cable, length 1M, parallel wired with 32A CEE form connectors

Note: Parallel is a consistent voltage in circuit, and current is shared between the two instruments. The series wired, the current through each of the lighting instruments is the same, and the voltage across the lighting instruments is the sum of the voltages across each lighting instruments.

3-Phase Y-Splitter fan-out cable set is taking three phase power and making three single phase outlets. It is fabricated with two layers. The inner core is PVC injected molding with internally wired, offering great tensile force. The outer is rubber molding cover with excellent impact-absorbency and insulation. This Y splitter is embossed with identification marks showing where each of phase is going. Molded with H07RN-F rubber cables for fire retardant and oil resistant.

Specification

1. Max. 32A (415V) three phase Y splitter
2. Input cable: 5 x 4.0mmsq H07RN-F
3. Output cable: 5 x 4.0mmsq H07RN-F
4. Overall length 100cm (without connector)

KUPO Power Cable

Flexible power cables covering 16–400 A, offered as single-core feeders and multi-core constructions for portable power distribution or fixed installations. Built with fine-stranded copper for high flexibility and low DC resistance, they use PVC insulation and a durable PVC outer sheath for easy stripping, smooth cable-gland fit, and stable coiling. All cables are rated 600 V; single-core IV versions are rated to 105 °C, while multi-core versions are rated to 60 °C. Support a tight bend radius, consistent OD tolerances, clear conductor identification, and rugged jackets designed for repeated handling in industrial and event environments.

Specification

Single-core (IV), 105 °C, PVC

MULTI-CORE 18 CABLE

Designed for portable entertainment rigs. This lightweight yet heavy-duty cable is designed to support six-circuit power distribution and repeated load-in/out cycles. A self-extinguishing, flame-retardant PVC jacket and high abrasion resistance protect against wear, while fine-stranded conductors keep it highly flexible, even in low temperatures. Engineered to withstand mechanical stress, it delivers stable, low-loss power and control transmission with the professional reliability required for critical indoor use.

KUPO Break-out/ Break-in Cable Assembly

Break-out or break-in cable set is assembled with superior H07RN-F cable. Made of special cross-linked elastomer for excellent insulation. Great suppleness offering better resistance to inclement environmental condition to oils and greases, as well as adverse chemicals and thermal effects. In accordance with RoHS and IEC/EN 60332-1-2 standard. Ideal for installation on equipment in continual and interrupted operation under aggressive condition such as construction site vehicles, generator, pumps and other most extreme and severe usage industry applications. Break-in(fan-in) is also available upon request.

- Working Voltage: 450 / 750V

- Working Temperature: -30°C / +60°C (max. conductor temperature in service +85°C)

KUPO Multi-cable Roller

Rolling a cable can be easy, but rolling couple of dozens can be annoying. Multi-cable roller makes life easier. It is an easy-to-use gear to organize the cable set. With several steps of assembly, you can build it up and then roll different kinds of cable effectively. Take less effort, do a nice job, all you need to do is to run your cable set with this machine. Getting a great cable management done can be that simple.

CR-234 Multi-Cable Roller

Weight: 75 kgs

Dimension: 110(L) x 105(W) x 148(H) cm

Cable drums sizes: 20 / 30 / 40 cm

Material: Cold rolled steel plate

Power Input: 110VAC/60Hz, 220VAC/50Hz

Power Consumption: 110V/6A, 220V/3A

Roller Speed: 20 RPM

KUPO Dr.Harting & Dr.Soca

Dr. Harting and Dr. Soca are dual-function testers designed for diagnosing wiring on 19-pin Soca or Multipole (Letriflex/Harting) extension cables, as well as checking lamp/load status on lighting bars.

The LCD displays real-time test results through pin-to-pin scanning. Any wiring issue such as missing connections, swapped pins, shorts, or opens, is clearly shown on the screen. Operating instructions are laser-engraved on the main chassis for fast and intuitive use.

Press the "RUN" button to initiate testing and navigate operational modes. The auto-sense feature automatically switches between cable-testing and load-testing modes. The unit is powered by 4 x AAA batteries or an external 5-18 V adaptor, and it automatically powers off after 100 seconds of inactivity to conserve energy.

Threadless 19-pin connectors and open Multipole interfaces allow convenient access when working with extension cables. Both testers feature a lightweight, compact aluminum-alloy chassis and can be bolted to a work bench, providing a stable platform for cable-assembly work.

Threadless 19-Pin connector provides a swift and convenient plug-and-play.

Roomy slot for hand-carry.

Other than cable tester, it also conduct lamp/load testing.

Bolted to a work bench without movement for better cable testing job.

KUPO 19-pin Cable Tester

The KUPO 19-pin Cable Tester is a compact and efficient tool designed for fast and reliable testing of 19-pin Soca extension cables. Built with a classic PLS-series connector, it is fully compatible with cable sets using major brands of Socapex-style connectors.

Simply connect the cable, and the tester automatically evaluates the circuit status. A rotary channel selector with six LEDs on the female connector allows users to check each channel individually. A red LED clearly indicates any wiring faults such as miswiring or open circuits.

The tester features bright LEDs with reduced power consumption.

A buzzer provides audible warning if a short circuit is detected between the ground and live conductors.

All electronic components are PCB-mounted and securely interconnected for durability.

KUPO Digi-Check — Multi-Function DMX Diagnostic Tool

The KUPO DIGI-CHECK is a compact, multi-function device designed for DMX512 signal diagnostics and cable testing. It integrates a DMX detection module with a bright white LED torch light, making it an essential tool for technicians on the move.

Features

- 9 LEDs provide detailed indication of DMX signal and data-line status.
- Auto power-off after 120 seconds of inactivity to preserve battery life.
- Tool-free battery replacement.
- Supplied with a leather pouch and strap for maximum portability.
- CNC-machined anodized aluminum housing.
- Built-in white LED torch light.
- 3-pin and 5-pin XLR male and female connectors.
- Embedded DMX512 signal-level and load analyzer.
- Supports individual or installed data-line inspection modes.

DC-920 5-Pin Digi-check / Multi-function DMX Tester

Dimension: 22 x 137 mm
Weight: 0.15kg

DC-930 3-Pin Digi-check / Multi-function DMX Tester

Dimension: 22 x 137 mm
Weight: 0.15kg

Specifications

- Power supply: DC 12 V / 1 A
- Battery: LR44 x 3 pcs (included)
- Supports DMX512 / 1990 protocol
- DMX connectors: XLR 5-pin x 2, XLR 3-pin x 2

YOUTUBE
KUPO DIGI-CHECK

Innovative Function

For testing pre-installed DMX lines, place one Digi-check at each end of the cable.
(Requires one XLR female adaptor for this operation.)

DS-TM3 DIGI-SIT / DMX Terminator (XLR 3 PIN)

DS-TM4 DIGI-SIT / DMX Terminator (XLR 4 PIN)

DS-TM5 DIGI-SIT / DMX Terminator (XLR 5 PIN)

A DMX terminator is essential for maintaining signal integrity in DMX512 systems.

It reduces signal reflections, stabilizes transmission, and improves overall DMX performance.

KUPO DMX Terminators include integrated protective circuitry and an LED indicator that confirms the presence of DMX data.

Dimension: 100(W) x 133(H) x 50(D) mm / Weight: 0.04kg

KUPO Cable Crossover

KUPO Cable Crossovers are engineered to protect electrical cables and hoses against both vehicle and pedestrian traffic. Manufactured from durable, UV-stabilized polyurethane, they feature an anti-slip surface and a high load-bearing capacity suitable for demanding environments.

An interlocking male/female system allows multiple units to be connected for extended coverage, making them ideal for event venues, stages, studios, and outdoor temporary installations.

Available in 3 to 5 channel models, the operation temperature is -40 C° to 49 C° and the load bearing capacity is 2,000 kg. It is suitable for indoor and outdoor use.

Anti-slip textured surface and heavy-duty polyurethane construction, grooved for accommodating cables, provides superior wire protection

Bright yellow lid for high visibility

Clear warning sign on the cover indicates a potentially hazard condition

Dog bone connector, featuring male and female end, makes multiple cable crossover in a row

Premium Waterproof Power Connection Box

Protect your electrical connections with IP65-rated waterproof connector box. Made of UL94-V2 flame retardant PC material, this patent and premium protection box is designed for the versatile cable set connection applications including Soca 19-pin, European, and American single pole connectors and extension cables. The detachable silicone bushing accommodates 17-22mm cable diameters and can be easily customized to meet specific requirements. Designed for quick installation and minimal maintenance, this robust box is ideal for any outdoor application where protection from the elements is crucial. Enhance your equipment safety and reliability with this durable waterproof connector box – the perfect solution for professionals who demand dependable performance in challenging environments.

Patent No.: ZL2023 3 0334789.4

Product Number	Product Details
PWP-550	Premium Waterproof Power Connection Box

IP65 Superior Protection

Effectively shielding your electrical connections from rain and moisture, and ensures your equipment continues to operate flawlessly even during adverse weather conditions.

Detachable Silicone Bushing

Accommodates cable diameters from 17-22mm with a quick-change design for effortless adaptation and replacement. Custom sizing options available to precisely match your specific project requirements.

Exceptional Compatibility

The box accommodates a wide range of connector types, including Soca 19-pin, European, and American standards, providing the flexibility for various applications across different fields.

Robust and Flame Retardant

Crafted from UL94-V2 rated polycarbonate, offering superior durability with advanced fire resistance. This premium material ensures critical safety protection in challenging environments.

KUPO Cable Holder

Mounted with large metal eyelet, this cable holder is made with a sturdy Nylon loop and hook with excellent holding strength for handling heavy weight. Helps to keep cables in place and well-organized. With carabiner and additional clamp, cables can be attached on the truss, tube or pipe without much effort. Handy write-on area for custom identification and labeling. Maximum cable bundle diameter 10cm. Pack of 5 with twist locking aluminum carabiner.

EZ440CH-B Cable Holder

Maximum cable bundle diameter 10cm.
Pack of 5 with twist locking aluminum carabiner.

BG4506 6 Inch Heavy Duty Black Ball Bungees

Each bungee cord measures (4.5mm) 3/16" in diameter and has an attached black plastic ball measuring 28mm (1-1/8") in diameter. Set includes 50 ball bungees. Easy to use, quick to install. Just feed the elastic loop through a grommet until the plastic ball is flush, then attach the loop to a fixed point to secure a tarp. Great for securing textile on the butterfly frame, cables, stands, hoses, camping and tying down tarps and shades, etc. Elastic cord design allows for stretching and variations in length from 6" up to 8".

KUPO Elastic Cable Tie

The elastic cable tie is made of stretchable and durable rubber material with wooden toggle allowing you to simply pull the elastic and over the toggle to assure a secure tie. Perfect cable management solution to keep your cables neatly coiled and free from damaging kinks. These great handy elastic cable ties are must-have for photographers movie makers, musicians, and audio professional to organize cords, cables, and stretching tarps.

GC-2525BK Glove Gripper (Black Label)

GC-2525BN Glove Gripper (Brown Label)

Made of heavy duty 25cm wide nylon strap with a powerful alligator spring clip, the Kupo Glove Gripper is designed for secure your gloves, hats & tools and keep them handy at all times. Features an instant strap button allow to easily attaches to your belt loop, mic loop, d-ring, tool belt or anything else you can find.

KCP-349 Utility Glove Gripper

Primary designed for holding a work glove with the PVC coated spring clamp, the utility glove gripper comes with a swivel snap locking hook allowing you to keep anything clipped on a waist belt or tool bag. In addition, the utility glove gripper has many different uses for example: clipping tools, golf towels, hats, wet suits, back packs, and more.

With adhesive lined up inside, it is made for providing excellent electrical insulation and protection to cable joint and termination. High impact, abrasion and corrosion resistance. UV and waterproof while sealed. Easily fit over irregular shape and large connectors.

KUPO Utility AC Bag

Designed primarily for camera assistants in the film Industry and suitable to anyone who needs rapid access to various tools. The Kupo Utility AC bag is made by 1,000 Denier cordex textured nylon fabric with a water resistant polyurethane coating on the inside. Inside the main compartment is a separate pouch, as well as a Velcro see-through mesh pocket on the underside of the main flap which is ideal for storing media cards and other small items. The bag fits utility belts up to 2 inches in width allowing you to take the bag on and off super easily. Exterior of the bag has 6 slip pockets (two of them are with a Velcro flap) which can hold dry-erase markers, sharpies, pens, chalk, pencils, hex keys, screw drivers, Leatherman and Maglite for easy access. An ideal AC bag that keeps all your essential tools and accessories organized.

Interior Size: 20cm(7.87")(L) x 9cm(3.54")(W) x 14.5cm(5.71")(H)

More Features:

Velcro top flap ensures tools won't accidentally fall out when on a ladder.

A slip bag on the side of the bag with a Velcro flap for additional storage.

The top flap can be folded and attached to the cover for easy access without noise.

D-Rings on one side of the bag for attaching a gaffa tape holder strap or glove gripper.

The side metal hook is perfect for mounting a tape measure.

Can be easily carried on a 2.5" width belt.

Features:

1. Fabricated of 2"(48mm) durable nylon fabric
2. Compatible with KUPO Utility AC Bag
3. Fit waist size 30"-45"
4. Quick release buckle with safety lock

KSB-002 Tool Belt

This 2"(48mm) belt is designed to carry add-on accessories for camera man or film screws. Made of durable nylon fabric to hold tool pouches or storage bags. Velcro-adjustable to fit the waist size from 30" up to 45". Heavy-duty quick release buckle with safety lock prevents accidental release.

KUPO EZ-TIE

The KUPO EZ-Tie provides a simple and convenient solution for bundling and organizing a wide range of cables. Constructed from durable nylon with a hook-and-loop fastening system, it is lightweight, reusable, and ideal for repeated use in professional production environments.

Designed with an eyelet, it can be easily attached to cables, hooks, or rigging accessories for quick access and secure storage.

Technical Specifications:

Environmental & Durability Tests

- Successfully tested at +93 °C and -56.7 °C for 1,000 hours of continuous mating without failure
- Operating temperature range: -20 °C to +80 °C

Mechanical Performance

- High cycle life: over 10,000 open/close cycles
- Hook-and-loop retention maintained after long-term thermal cycling

Material Characteristics

- Washable design suitable for repeated use
- UV-resistant material prevents fading or discoloration under sunlight exposure

- Keep small cable neat and trim.
- Two perforated slots for double wrap with cable firmly at all times.

The Adhesive Hook & Loop Tape is made from high-quality nylon fabric with a superior hot-melt adhesive, providing excellent and reliable holding strength when the hook and loop surfaces engage.

Each roll is 25 mm (1") wide and 5 meters long, offering a versatile and easy-to-use fastening solution.

Simply cut the desired length and apply it to the intended item. It is suitable for smooth, flat, and clean surfaces such as walls, plastic, glass, wood, and similar materials.

Each package includes:

- 1 x 5 m hook tape
- 1 x 5 m loop tape

Adhesive Feature

- Loop Tack: 3.3 kgs (+/- 0.5) kg/in²
- Peel Adhesion: 3.2 kgs (+/- 0.5) kg/in²
- Holding Power: 4 psi (12 hrs)
- SAFT Test: 65 (+/-5) Celsius degree

Backing with superior adhesive.

Supplied with 1"(25mm) width x 5 meter long.

Application:

Upgrade your CROXS case with an additional storage space.

Attach the loop tape on the CROXS case.

Apply a car trunk storage bag.

KUPO Gaffa Tape

Kupo offers a highly versatile and widely used Gaffa Tape designed to meet the demanding holding and sealing needs of the professional stage, photography, motion picture, and television industries.

Formulated with a blend of natural rubber and synthetic resin adhesive, it provides excellent tack and adhesion across a wide temperature range.

Kupo Gaffa Tape delivers exceptional tensile strength while still maintaining an easy-to-tear hand-feel, making it both durable and convenient for fast on-site applications.

Features

- Non-transferring adhesive tape; clean removal, leaving without residual.
- Heat Resistance: 80 degree C / 180 min.
- Tensile Strength: 12.5 (KGF / 25 mm).
- Backing Material: Cloth with PE coated.
- Feasible for smooth, rough and irregular surface.
- Adhesive: Natural rubber base.

KUPO Cloth Spike Tape

KUPO Cloth Spike Tape features highly visible fluorescent colors with a matte finish, making it ideal for a wide range of applications in the audio/visual, television, photography, theatrical, and motion picture industries.

It provides clearly identifiable marks for actors, crew members, musicians, and camera operators, and is also suitable for color-coding, labeling, and general marking tasks.

This multi-purpose tape tears easily by hand yet remains durable in demanding environments.

It delivers excellent holding power, high tensile strength, and is fluorescent-reactive under black light, ensuring visibility in both standard and low-light production settings.

GT-0345 Gaffers Tape Holder Strap

Designed for easy to carry gaffers, spike & rolls of electrical tape on your belt or equipments to keep your hand free to work. Constructed from quality carabiner clip with chrome 'O' ring on a safety cable fabricated of galvanized steel wire (dia.3mm/ Length: 450mm) ensures a long lasting, durable product.

GT-0345-B Gaffers Tape Holder Strap

Designed for easy to carry gaffers, spike & rolls of electrical tape on your belt or equipments to keep your hand free to work. Constructed from quality carabiner clip on a safety cable fabricated of galvanized steel wire (dia.3mm/ Length: 450mm) ensures a long lasting, durable product. Safety cable is coated with transparent PVC plastic making the operation smoother.

GT-2540BK Gaffer Tape Holder Strap With Spring Hook (Black Label)

GT-2540BN Gaffer Tape Holder Strap With Spring Hook (Brown Label)

Constructed from durable nylon fabric, the Kupo gaffers tape holder strap, measured 25cm in length and 4cm in width, designed for easy to carry gaffers, spike & rolls of electrical tape on your belt to keep your hand free to work. It comes with aluminum spring hook that secures the holder to your belt effortlessly. The rigid release buckle also allows you to quick and secure put your tapes or tools on and off from the holder strap.

KD-C26 Cable Clip For Tube Size: 22~26 mm

The cable clips keep your cable and hex wrench gathered to the light stand. (Set of 4)

Specification

- Material: Polyethylene Film
- Adhesive: N/A
- Tape Thickness: 0.05mm (2 Mils)
- Tape Width: 75mm (3 inches)
- Tape Length: 100m (328 feet)

Features

- Easy to use, high visibility
- No sticky, glue residual free
- Strong, durability and reusable
- Yellow color tape printed legend "CAUTION"
